

J4 SYSTEMS

APRIL 2016

Ransomware...Are you safe??

2016 has been named the year of RANSOMWARE! Ransomware is a well-known issue in IT security that seizes control of a computer system's files and encrypts the files. The files are then held hostage by the hacker until the victim pays a ransom online with an untraceable digital currency known as Bitcoin. Last year, ransomware victims reported over \$24 million dollars in losses. So far, in only three months, ransomware reports are at an all-time high, costing victims more than \$200 million dollars.

With more than two decades as an IT consulting company, J4 Systems has the expertise to assess your company's specific needs and vulnerabilities.

We can help you with a ransomware prevention plan - whether it's encrypting your files, installing antivirus, or implementing a strategic backup and recovery plan.

Some Key Tips for Protecting Yourself

- Install and use an up-to-date antivirus.
- Have pop-up blocker running in your web browser.
- Avoid clicking links, opening attachments or emails from people you don't know or companies you don't do business with.
- Regularly backup your important files.

Let us guide you and your company to safety!

For current employment opportunities click our Systems Up logo and upload your resume.

Employee Spotlight

Josh Nuckolls is a Tier One NOC Engineer and he is one of the newest members to join the J4 Systems family. In 2010 Josh joined the Navy and began his training in the IT field. He is currently in the Navy Reserves and would like to continue his IT education towards Network Administration.

Originally from Bakersfield, CA, Josh and his wife Katelyn recently moved to the Folsom area where they go camping, fishing and hiking with their two dogs, Thor and Juno.

Here around the office we have noticed, besides his IT skills, Josh is a man of many talents. We have been entertained with ukulele jam sessions, card trick shows, cartoon drawings and I would even say he is a bit of a comedian. We can always count on Josh for a laugh.

When asked how he likes working for J4 Systems, he replied, "It's a solid company to work for and the culture is pretty fun."

Our commitment to ensuring our services meet your expectations means we value your feedback. If you have any suggestions or comments on how we can improve, please let us know. Just email sanderson@j4systems.com
