Wireless Managed Service and Surveying

By 2020, the US wireless market is expected to increase 100 Million wireless subscribers. With the vast addition of wireless solutions, a reliable connection is crucial. The loss of wireless connection can drastically decrease productivity, reduce dependability of critical equipment and ultimately impact the bottom line.

J4 Systems has state of the art equipment and wireless engineering experience to design, configure, install, monitor and manage your secure wireless network.

Wireless Surveying

By using specialized equipment to conduct comprehensive site mapping we can identify current or future wireless network issues.

Employee Spotlight!

This month we would like you to get to know our Bookkeeper, Kathy Potts.

Kathy has been a part of the J4 Systems family for over 16 years and with more than 30 years' experience in accounting, she is an essential part of J4 Systems work flow. She is responsible for all aspects of accounting: Billing, accounts receivable, accounts payable and payroll management.

Around the office Kathy is known for her creative and delicious baked goods and her cheerful personality. She loves spending time with her husband and three grandchildren. In her free time, Kathy loves to scrapbook, being a photographer, and staying healthy and fit. When she retires she would love to travel more and Nashville is her first stop.

When asked how she likes working for J4 Systems, she replied "I love working here! J4 Systems has been really good to me and I love being able to contribute to keeping us going strong."
